Full Stack Developer - PHP / Laravel (Remote Job)

Lyftyfy

Hallerstraße 8, Hamburg, Hamburg 20146, Germany.

- Worked on the company's Google Search Engine Advertisements specific tool, which could help customers to redirect Google traffic to their specific designed funnel pages using unique keyword combinations of their choice.
- Integrated Laravel-WebSockets for real-time communication between Laravel-backend and React JS-front end.
- Used RabbitMQ (queues and exchanges) for communication between different Microservices (console, iteration, accounts, kpi etc) by sending/receiving event-based messages.
- Developed Web API's for the backend Laravel-based Microservices.
- Used Docker to deploy the Microservices in a serverless environment.
- Used Gitlab for Continuous Integration and Continuous Delivery.

Skills/Tools:

. Laravel . Laravel Websockets . RabbitMQ . Microservices . API Development . Gitlab . Continuous Integration and Continuous Delivery (CI/CD) . Docker

NOV 2021 - APR 2022

PHP DEVELOPER (Remote Job)

XEPOS Ltd

Metropolitan Borough of Solihull, England, United Kingdom

- Worked on the back-end API's for an android based application named 'XONDER Business Account'. It is a banking app that allows customers to open their own E-Wallet current account using the MasterCard API.
- Developed API's for list of custom email notifications to help customers know in-time status of their account like account balance and debit/credit transactions etc.
- Developed Authentication and Authorization API's. Integrated functionalities in Transaction module for the app.

MAY 2021 - AUG 2021

SOFTWARE ENGINEER (Remote Job)

CoVi Analytics

The Minster Building, 21 Mincing Ln. London, United Kingdom.

- Worked on a web-based; core software system (Risk Assessment System) at CoVi Analytics.
- Developed a Top Risks Analysis Report (MS PowerPoint format) using PHPOffice/PHPPresentation.

Skills/Tools:

. PHP Core . Symfony 5 . PHP Office/PHP Presentation

Saryab Road Quetta, Balochistan - Pakistan.

- Developed Balochistan Rural Support Programme's (BRSP) official website. A special content management system was developed and integrated in order to update the website content timely by using administrative account rights.
- Developed Information Management System for Malaria Control Programme (MCP) that was implemented in 24 districts of the Balochistan by Balochistan Rural Support Programme (BRSP). MCP Information Management system used to help the district staff to report the monthly malaria report of health facilities in their district; by stating that how many malaria cases reported, what was the age break up of affected patients, what was the treatment/medication given to the patients and what was the status of laboratory items and medicine stocks.
- Developed the Poverty Score Card (PSC) web based reporting portal for Balochistan Rural Development & Community Empowerment Programme (BRDCEP). The Poverty Score Card (PSC) Survey was conducted for several districts of Balochistan to analyze the poverty status in the targeted districts. The BRDCEP web reporting portal helped the Monitoring & Evaluation team, Social Mobilization team and administrative team to generate PDF and CSV format reports in real time from the base PSC survey data to facilitate themselves in decision making and in implementing different project activities accordingly.

Skills/Tools:

. PHP Core . PHP Laravel . MySQL . PostgreSQL . Bootstrap . HTML5/CSS3 . Javascript . JQuery . Ajax . TCPdf . DomPdf . PHPExcel

Web Projects

Writing Service's Booking and Order Tracking System

Skills/Tools:

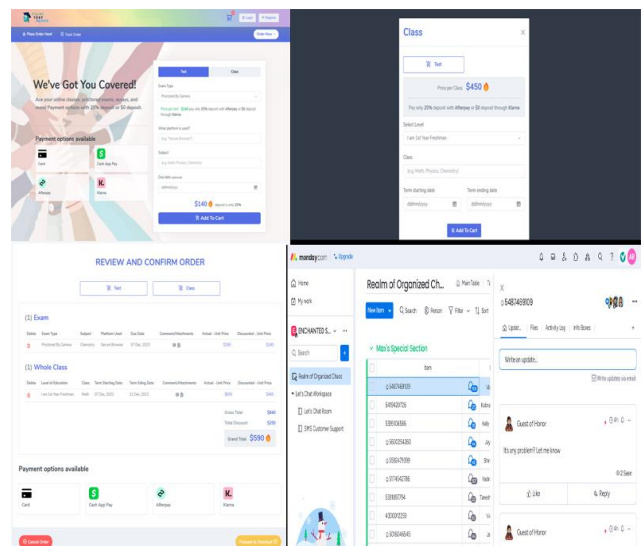

. PHP Core . PHP Laravel . Laravel Livewire . API . Pusher (web sockets) . GraphQL (Monday.com API). Webhooks (Monday.com and Stripe) . Stripe (payment gateway) . Cron Jobs (CPanel) . VPS (Linux) . MySQL . Bootstrap . HTML5/CSS3 . Javascript . JQuery

Web Link:

<https://arfullstackdev.com/resume-projects/onlinetestnerds>

Using this web application a user can book writing services (e.g. Essay Writing, Exam Writing, Whole Class) of his/her choice and go to Stripe's checkout to pay for the intended services using payment methods like Card, Klarna, Afterpay/Clearpay, Cashapp Pay.

The saved orders will be synched via Cron Jobs command to add into Monday.com board items using Monday.com's GraphQL API. The customer can track his/her order status and communicate with the host using a custom built order management section.

The communications are the updates that host creates at Monday.com’s order specific item or created by customer via web chat and the messages are propagated between web and Monday.com portal vice versa in real-time by using Monday.com’s webhooks and Pusher (websockets).

Following are the key features:

- Register a user account via Gmail or via web registration form.
- Add Writing services of ones choice into a cart.
- Complete order by paying via Stripe’s checkout page.
- Cron Job sync’s new orders with Monday.com’s board items.
- User is notified in real-time about the status of his/her order.
- An order referral section that tracks the referrals for orders, That are referred by a particular user by sharing his/her referral Link.
- Monday.com’s webhooks used to propagate special messages (e.g. order status or chat messages) via Pusher’s (websockets) in real-time between web portal and Monday.com’s portal vice versa.

Sanchez Devs IT Company Website (WordPress Custom theme development)

Skills/Tools:

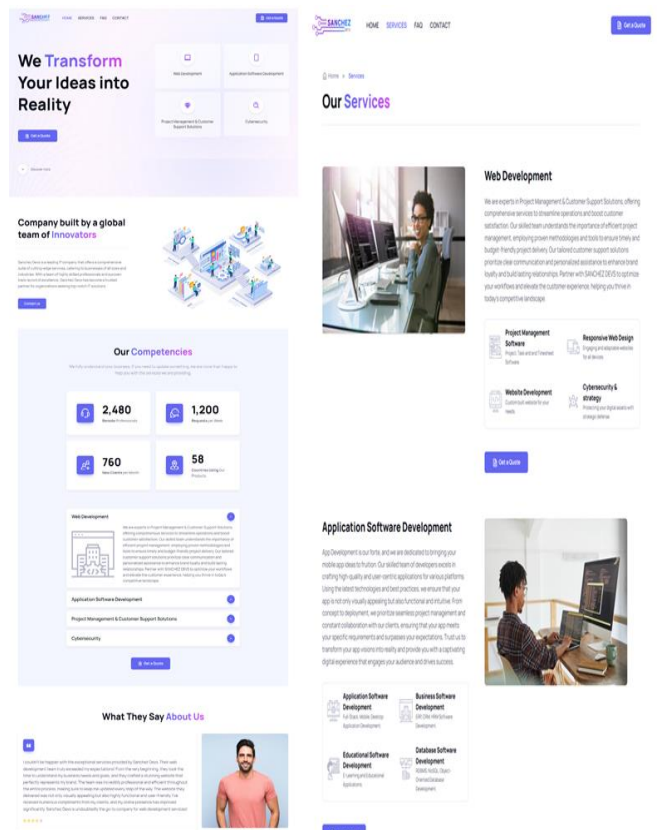

. WordPress (custom theme development) . PHP Core . Advanced custom fields (WordPress plugin)
. Contact Form 7 (WordPress plugin) . MySQL . Bootstrap . HTML5/CSS3 . Javascript . JQuery . Ajax

Web Link: <https://arfullstackdev.com/resume-projects/sanchezdevs-wp>

Sanchez Devs is an American based IT company. The website is developed by converting static html/css theme into a WordPress via custom theme development approach. The website lists the services provided by company such as Web Development, Custom Software Development, Project Management and Customer Support Solutions and Cyber Security. A custom quotation form is integrated at the website that help customers to request a quotation for a specific service they are looking for.

Following are the key features:

- Add/Edit Services the company is offering.
- Add/Edit Frequently Asked Questions.
- Add/Edit Customer reviews.
- Add/Edit Clients that company collaborates/work with.
- Add/Edit Section for key statistics.
- A Quotation and Contact form is integrated for getting customers’ requests for specific services or queries/feedback.

Task Management System

Skills/Tools:

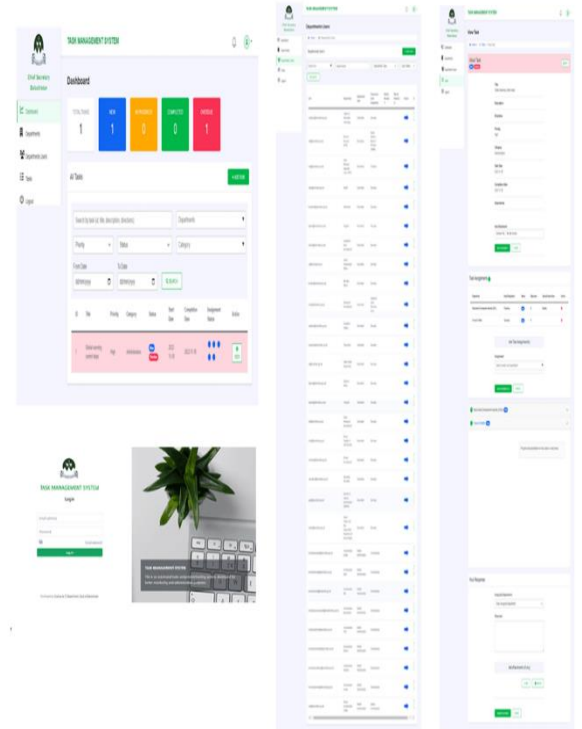

. PHP Core . PHP Laravel . Laravel Livewire . Pusher (for real time push notifications) . MySQL . Bootstrap . HTML5/CSS3 . Javascript . JQuery

Web Link: <https://tms.sit.gob.pk>

Task management system is an automated tasks assignment/tracking system, developed for better monitoring and administration purposes. It was specially developed for the Chief Secretary of Balochistan province.

Following are the key features:

- Add/Edit Departmental users.
- Assign task to one/many Government Departments.
- View/Edit Task Details/document attachments.
- Department may update the task status from New to In Progress or Completed.
- Task based communication between task assignee and the task assigned department.
- Delete task if found irrelevant.
- Dashboard to track/monitor the statistics of the tasks by stating total, new, in-progress, completed and overdue tasks. There also a search table integrated to search through tasks as per the search indicators.
- Pusher (for real time push notifications) is used to notify the signed in user in real time about his/her related task events such as assignment, deletion and updating.

Job Portal (For Balochistan Government/Autonomous Bodies)

Skills/Tools:

. PHP Laravel . Laravel Livewire . MySQL . Laravel Excel . Bootstrap . HTML5/CSS3 . Javascript . JQuery

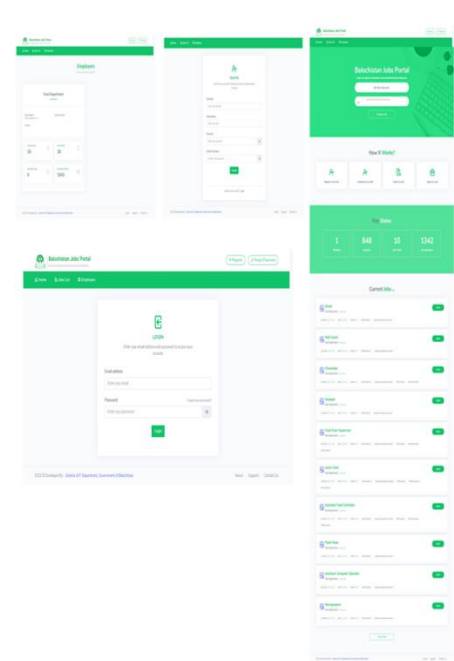

Web Link: <https://jobportal.sit.gob.pk>

The Jobs Portal is an online system through which recruiters (Balochistan Government/Autonomous Bodies) may publish the jobs and general public may apply for the said jobs by registering their accounts and upon completing their portfolio information.

Following are the key features:

- Recruiter's may publish jobs for different divisions/zones , districts/cities of Balochistan province and also under special quota such as minorities, women, PWDs.

- General User need to register his/her account first.
- Verify his/her account by clicking a verification link sent to him/her via email.
- After completing verification step now he/she is required to complete his/her portfolio by providing personal information, uploading CNIC document, providing details regarding his/her educational career, and optionally can mention about his/her work experience and about trainings he/she has participated/completed.
- After completing his/her portfolio, user now can single click apply for any job of his/her interest/experience/education relevant, published by any department.
- Department/Recruiter can edit job details whenever needed.
- Once the users apply for any given job, then the list of job applications will be forwarded to department's admin account.
- Having job applications presented; departments now can shortlist a suitable candidate against any published job and can download the job applicant's list in MS Excel format.

Complaint Management System (For Chief Minister of Balochistan)

Skills/Tools:

. PHP Laravel . PHP Core . MySQL . DomPdf . Bootstrap . HTML5/CSS3 . Javascript . JQuery

Web Link: <https://cmcp.sit.gob.pk>

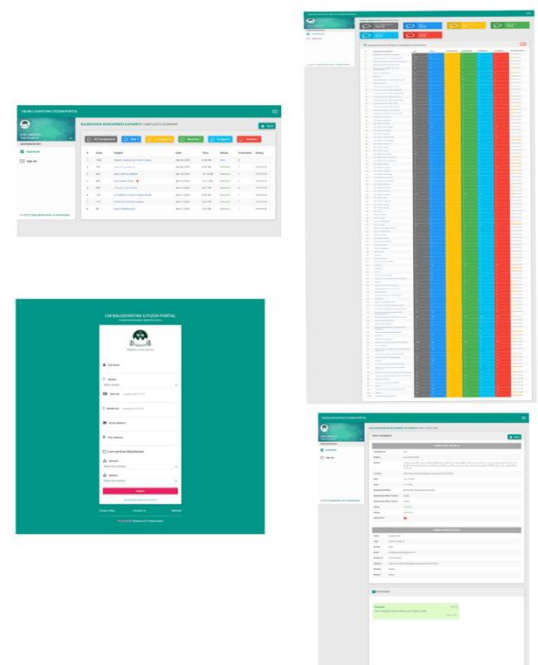

Complaint Management System is developed for the general public of the province to timely forward their grievances/complaints to the relevant Government Department.

The departments will resolve the received complaints on priority basis.

The Chief Minister account will help the CM to monitor the complaints received and the appropriate actions taken by the departments towards complaints resolution.

Following are the key features:

- The Super Admin user may add departments along with their user accounts.
- Public user needs to register his/her account first.
- creating his/her account now he/she can launch the complaint and forward to the relevant department for resolution.
- Departments receive the complaints, change the status to in-progress or resolved.
- After complaint resolution, the department will reply with the complaint resolution remarks, so the complaint launching body could see and verify if his/her complaint has been resolved.
- Each user account has its own dashboard to present the key states of complaints and its resolution status.

- Chief Minister account will help to check the accumulative status about all launched complaints, department wise and the steps taken for their resolution.

Car Dealer Application (WordPress Custom theme development)

Skills/Tools:

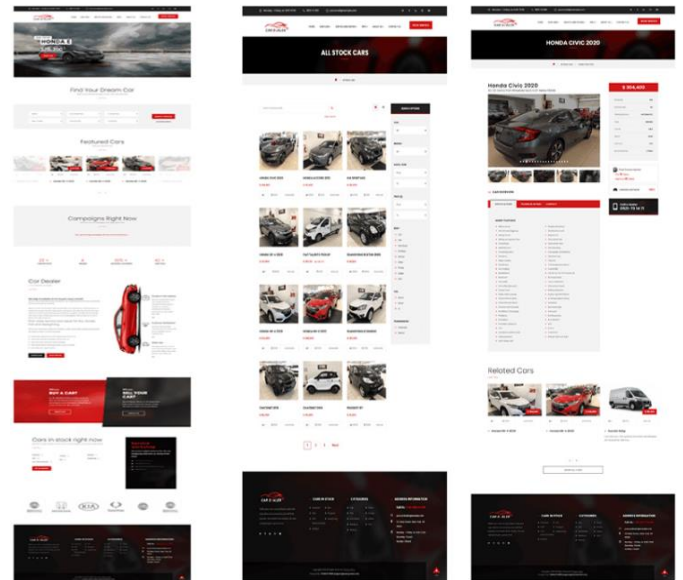

. WordPress (custom theme development) . PHP Core . Advanced custom fields (WordPress plugin) . MySQL . Bootstrap . HTML5/CSS3 . Javascript . JQuery . Ajax

Web Link: <https://arfullstackdev.com/resume-projects/cardealer-wp>
